DETAILED ACTION

1. This application is in condition for allowance. Claims 1-7, 18-24, 34-41 are directed to non-elected claims without traverse. Accordingly, claim 1-7, 18-24, 35-41 and 52-53 have been cancelled.

Allowable Subject Matter

2. Claims 8-17, 25-34, 42-51 and 54 are allowed.

The following is an examiner's statement of reason for allowance:

The present invention is directed to a method and system providing conference services to users and allowing insertion of an advertisement viewed by a plurality of client computers when participating in a conference. The independent claim 1, identifies an uniquely distinct feature "an advertisement designator operably connected to said storage and said access status detector for designating insertion of one of said advertisements to said server according to said information on said advertisements in said storage, when said detected access status satisfies a predetermined condition".

The independent claim 25, identifies an uniquely distinct feature "a designation circuit operably connected to said storage circuit and said detection circuit for designating insertion of one of said advertisement to said server according to said information on said advertisements in said storage circuit, when said detected access status satisfies a predetermined condition"

The independent claim 42, identifies an uniquely distinct feature "designating insertion of one of said advertisement to said server based on information on said advertisements prepared when said detected access status satisfies a predetermined condition".

Art Unit: 2143

The independent claim 54, identifies an uniquely distinct feature “designating insertion of one of said advertisement to said server based on information on said advertisements when said detected access status satisfies a predetermined condition”.

The closest prior art, Ballard (U.S. 6,182,050) discloses advertisements distributed on-line using target criteria screening with method for maintaining end user privacy, Matsumoto et al. (U.S. 6,763,334) discloses a system and method of arranging delivery of advertisements over Internet, Gupta et al. (U.S. 6,487,538) discloses a method and apparatus for local advertising, whether taken alone or in combination fails to anticipate or render the above underline.
